Thin Solid Films, 188 (1990) 396

Contents of Vol. 188

Issue 1

Electronics and Optics

Investigations of magnetostriction in $Co_{0.86}Ti_{0.14}$ amorphous thin films 1
R. Żuberek, H. Szymczak (Warsaw, Poland), G. Suran and K. Ounadjela (Meudon, France)

D.c. resistivity variation of cold-deposited silver films during gas exposure 7
C. Holzapfel, F. Stubenrauch, D. Schumacher and A. Otto (Düsseldorf, F.R.G.)

Formation of patterned tin oxide thin films by ion beam decomposition of metallo-organics 21
A. B. Catalan, J. V. Mantese, A. H. Hamdi, R. C. O. Laugal and A. L. Micheli (Warren, MI, U.S.A.)

Thermal conductivity and diffusivity of a thin film SiO_2–Si_3N_4 sandwich system 27
F. Völklein (Jena, G.D.R.)

Metallurgical and Protective Layers

Observation of reactions between Ti/permalloy bilayer thin films annealed at low temperatures . . 35
M. Kitada, N. Shimizu and T. Shimotsu (Tokyo, Japan)

Domain period determination in CoCr films 43
J. Šimšová, R. Gemperle, J. C. Lodder, J. Kaczér, L. Murtinová, S. Saic and I. Tomáš (Prague, Czechoslovakia)

Compound synthesis by an electric-field-generated plasma at the liquid–solid interface 57
N. R. Bulakh, S. V. Ghaisas, S. M. Kanetkar and S. B. Ogale (Pune, India)

Interdiffusion and reaction in (Cr–Si)/Al and (Cr–Si–O)/Al thin film systems 67
K.-H. Bäther, G. Zies, R. Voigtmann, W. Moldenhauer and H. Schreiber (Dresden, G.D.R.)

Preparation and Characterization

Passivation de InSb: croissance et composition chimique de sulfures natifs obtenus par plasma haute fréquence 85
N. Agoudjil (Montpellier, France), R. Saoudi (Villeurbanne, France), M. Gendry et J. Durand (Montpellier, France)

Nucleation and growth of crystallites in amorphous antimony layers on as-deposited ultrathin sublayers of metal: copper, silver, gold, tin and lead 95
M. Hashimoto, K. Umezawa and R. Murayama (Tokyo, Japan)

Statistical analysis of Auger electron spectroscopy data for thin film growth modes 109
L. C. G. Rogers (Cambridge, U.K.) and G. E. Rhead (Paris, France)

Crystal forms and their orientation in poly(vinylidene fluoride) films prepared by an ionized-vapour deposition method 123
J. Sakata and M. Mochizuki (Aichi, Japan)

Thin film growth of silver sulphide
I: initial stages of heteroepitaxy on NaCl 133
H. Haefke (Halle, G.D.R.), A. Panov and V. Dimov (Sofia, Bulgaria)

Chemical vapour deposition of boron carbide from BBr_3–CH_4–H_2 mixtures in a microwave plasma 143
V. Cholet, R. Herbin and L. Vandenbulcke (Orléans, France)

Sputter-deposited WB_x films 157
J. Willer, S. Pompl and D. Ristow (Munich, F.R.G.)

Annealing behaviour of clean and oxygen covered polycrystalline palladium films: a work function and electrical resistance study 165
J. M. Heras, G. Estiú and L. Viscido (La Plata, Argentina)

Oriented films of molybdenum trioxide 173
W. M. R. Divigalpitiya, R. F. Frindt and S. R. Morrison (Burnaby, British Columbia, Canada)

Langmuir–Blodgett and Related Films

Optical characterization of thin films of some phthalocyanines by spectroscopic ellipsometry . . . 181
J. Mårtensson and H. Arwin (Linköping, Sweden)

Condensed Matter Film Behaviour

On possible preferred orientation relationships at the b.c.c.(110)–f.c.c.(111) interface 193
H. Fukuda and Y. Gotoh (Chiba, Japan)

Issue 2

Electronics and Optics

Erbium-oxide-based metal–insulator–semiconductor structures on silicon 203
T. S. Kalkur and Y. C. Lu (Colorado Springs, CO, U.S.A.)

GaAs power metal–insulator–semiconductor field effect transistor with superlattice gate insulator and superlattice buffer structure 213
W. C. Liu, W. S. Lour and C. Y. Sun (Tainan, Taiwan)

Metallurgical and Protective Layers

Tribological performance and deformation of sputter-deposited MoS_2 solid lubricant films during sliding wear and indentation contact 219
M. R. Hilton, R. Bauer and P. D. Fleischauer (El Segundo, CA, U.S.A.)

Isotopic study of oxygen diffusion in silicon dioxide thin films 237
D. A. Gulino, L. A. Kren and T. M. Dever (Cleveland, OH, U.S.A.)

Influence of heat treatments on the electrical resistance of thin film copper/electroless nickel microcircuit interconnections 247
J. S. Loos and B. A. ter Haar (Murray Hill, NJ, U.S.A.)

Crystallization kinetics of amorphous $NiSi_x$ films. 259
R. D. Thompson, J. Angilello and K. N. Tu (Yorktown Heights, NY, U.S.A.)

Investigations on cubic Ti(B,N) films prepared by reactive diode r.f. sputtering from a TiB_2 target . 267
E. Selbach, K. Schmidt and M. Wang (Jülich, F.R.G.)

Preparation and Characterization

Characteristic features of laser-produced plasmas for thin film deposition 275
A. Richter (Dresden, G.D.R.)

Cathodic arc evaporation of graphite with controlled cathode spot position 293
B. Rother, J. Siegel and J. Vetter (Karl-Marx-Stadt, G.D.R.)

Similarities in the chemical mechanisms of $CuInSe_2$ and CdS thin film formation by chemical spray pyrolysis 301
B. J. Brown and C. W. Bates, Jr. (Stanford, CA, U.S.A.)

R.f. diode sputtering. 307
J. S. Logan (Yorktown Heights, NY, U.S.A.)

ZnS thin films prepared by thermal decomposition of a coordination compound. 323
T. Maruyama and T. Kawaguchi (Kyoto, Japan)

Scanning tunnelling microscopy investigations of organic thin film topography 329
A. M. Troyanovskij (Moscow, U.S.S.R.), M. Hietschold (Karl-Marx-Stadt, G.D.R.), M. S. Khaikin (Moscow, U.S.S.R.), I. Androsch, W. Vollmann and M. Starke (Karl-Marx-Stadt, G.D.R.)

Nodular growth in thin films: preparation and transmission electron microscopy characterization in CoCr layers on silicon substrates. 335
R. Mattheis, F. Thrum and H.-J. Anklam (Jena, G.D.R.)

Langmuir–Blodgett and Related Films

Influence of subphase conditions on the properties of Langmuir–Blodgett films from substituted phthalocyaninato-polysiloxanes. 341
A. A. Kalachev, T. Sauer, V. Vogel, N. A. Plate and G. Wegner (Mainz, F.R.G.)

Evaporation of polyethylene powder for its thin film growth 355
K. Maki (Kanagawa, Japan)

Stability of insoluble monolayers and ionization of Langmuir–Blodgett multilayers of octadecanoic acid 361
R. Aveyard, B. P. Binks, N. Carr and A. W. Cross (Hull, U.K.)

Condensed Matter Film Behaviour

A closed expression for beam heating of thin films. 375
A. E. Curzon (Burnaby, British Columbia, Canada)

Internal stress of vapour-deposited aluminium on aluminium substrate films: effect of O_2 and water incorporated in the substrate 385
R. Abermann (Innsbruck, Austria)

Letters

A re-evaluation of hetero-epitaxy of continuous films on patterned substrates L1
Y. H. Xie (Murray Hill, NJ, U.S.A.)

Langmuir–Blodgett film of a water-soluble amphiphilic by convective monolayer compression . . L5
C. Kurthen and W. Nitsch (Garching, F.R.G.)

Author Index 395
